

LEDCEX SERIES COMBO LED EXIT SIGN WITH LED LIGHTS

OVERVIEW

Combination exit sign with emergency light models satisfy two building code requirements with just one fixture. When faced with installing an exit sign and an emergency light in the same location, choose a combo model.

LED TECHNOLOGY

The LEDCEX goes a step further than the conventional LED exit sign combo. This model features LED emergency lamps attached to the right and left side of the unit.

LED emergency lamps consume up to 90% less electricity than typical emergency light bulbs. Also, by using LED lamps instead of incandescent, the unit becomes more compact and comes with a long-lasting Nickel Cadmium exit sign battery.

EXTERNAL SPECIFICATIONS

The housing is constructed from a durable and flame-retardant thermoplastic that is corrosion resistant. This LED exit sign combo comes standard in white, but is also available with a black finish. The universal mounting bracket is easy to snap-on to the back or top of the sign.

INTERNAL SPECIFICATIONS

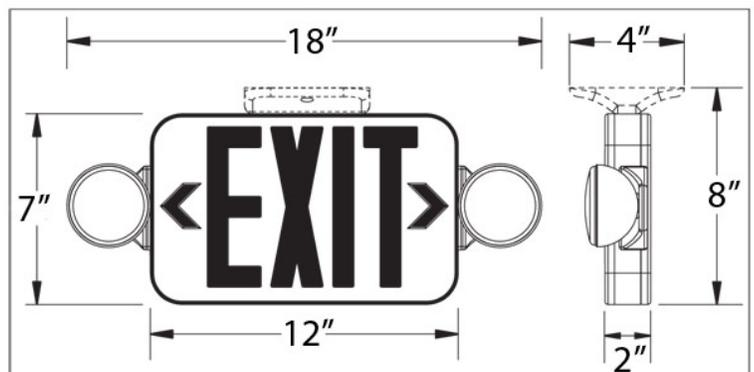

The LEDCEX is configured with universal 120/277v AC input and solid state charging circuitry. Low voltage disconnect, AC lockout, and brownout protection are included standard.

LED SPECIFICATIONS

Red or green LED illumination consumes less than 5 watts electricity at all times. Maintenance-free LED technology features an expected LED lifespan is up to 15 years.

LED emergency lamps provide the equivalent illumination of a 5.4w incandescent lamp, the standard lamp of non-LED exit sign combo units.

DIMENSIONS

Green LED model

COMPLIANCE

The LEDCEX Series emergency light is compliant with building and fire code regulations throughout the United States and Canada. ETL Listed to UL 924. NFPA 101 Life Safety Code, NEC, ICC, IBC, Damp Location Approved.

WARRANTY

The LEDCEX Series comes with a 5-year factory warranty. The lamps are not covered. Deliberate damage, misuse, or improper installation effectively cancel the warranty. Battery features a 20% per year

BATTERY BACKUP SYSTEM

The LEDCEX features a maintenance free, nickel cadmium exit sign battery. The battery features a 24-hour recharge time and provides 90-minutes of emergency run time. Comes standard with a current charge regulator. Simply press the external test button to satisfy monthly and yearly testing requirements.

INSTALLATION

Thermoplastic LED exit sign combos are for indoor installation onto normally inflammable surfaces. The TEX Series is relatively easy to install. The unit comes with detailed instructions and features a snap-together housing and mounting bracket to make installation quicker. Use the included mounting bracket for top (ceiling) or side (flag) mounting configurations.

Connect either 120 or 277v AC power into the unit, connect the battery, and let the fixture charge for 24 hours.

ORDERING INFORMATION

Series	Letter Color	Housing Color
